

Topic 1 Stoichiometric Relationships

Chapter 1 : Topic 1 Stoichiometric Relationships

Topic 1: stoichiometric relationships chemistry guide 37 1.3 reacting masses and volumes temperature and high pressure. • obtaining and using experimental values to calculate the molar mass of a gas Topic 1 - stoichiometric relationships practice problems - show all work 1. consider the relative abundance of the isotopes of element x. isotope relative 1 stoichiometric relationships introduction there is a broad community of people working within a wide variety of scientific disciplines and approaching their inquiry with common methodology, terminology and reasoning processes. chemistry can be regarded as the central science, and mathematics the language of science. in this chapter we begin to lay down many of the foundations on Topic 1: stoichiometric relationships chemistry guide 32 essential idea: physical and chemical properties depend on the ways in which different atoms combine. 11 ib chemistry topic 1 – stoichiometric relationships section 1.1 – the particulate nature of matter and chemical change exercises Review guide: unit 1- stoichiometric relationships topic 11.1: reading devices correctly uncertainty of a device analog vs. digital Topic 1 book chapter - coral gables-sh.enschool Syllabus content core [95 hours] topic 1: stoichiometric relationships 1.1 introduction to the particulate nature of matter and chemical change

1.1 stoichiometric relationships stoichiometric relationships 1 chapter outline describe the three states of matter. recall that atoms of different elements combine in fixed ratios to form compounds which have different properties from their component elements. recall the difference between homogeneous and heterogeneous mixtures. be able to construct and balance chemical equations. recall the definition of matter • mass • volume • particles • particles in constant motion element compound mixture pure pure not pure contain 1 type of atom contain 1 type of molecule with different atoms contain different types of particles shown by symbols shown by formula no specific figures
